

Architectural Technician / Technologist – Lungfish Architects

We are Lungfish Architects, an award-winning, RIBA chartered practice with our head office in Nottingham. Operating nationally, our UK-wide portfolio has exemplar and published designs across the education, residential, commercial and community sectors.

A new, exciting opportunity has opened within our team and we are looking to recruit an Architectural Technician or Technologist to join our team. The ideal candidate will have a minimum three-years Revit experience, be experienced in delivering fully coordinated models within a BIM environment and have a working knowledge of delivering BIM Level 2 projects.

Providing the full suite of architecture and interior design services, we are an open and collaborative practice, taking a client-first approach to our projects. This trust and enthusiasm, alongside our experience working with both traditional and modern methods of construction, allows us to deliver exceptional buildings.

We are specialists in education, residential, commercial, community, and interior architecture – we're urban designers, masterplanners and sustainability experts. Working closely with contractors and our clients, we design educational spaces, innovative homes, commercial and blue-light facilities, community assets - and a whole lot more.

Creating inspiring, innovative, and sustainable buildings, whilst delivering social value, is at the heart of what we do. If joining our innovative team appeals to you, or to find out more, please contact Craig Taylor, Director, craigt@lungfish-architects.co.uk.
